 Imperiled & Protected in NY
 Breeds Only On Long Island

Toxic Thermal Plume

From Waste Heat From Caithness That Can Exceed 233 Megawatts

Glider Bound For Calabro Airport

TOXIC "CAT"

("Clear Air Turbulence")
 Like a giant 233-megawatt hair dryer, Caithness will also cause dangerous, toxic-updrafts posing safety hazards to birds, aircraft, pilots and passengers from wind shear, CAT, thermal pollution & toxic hot air, etc.
